

## Now showing at the Australian Museum!

'How to Make a Monster - the art and technology of animatronics' is now showing in Sydney at the Australian Museum and runs from Saturday 29 October 2005 to Sunday 5 March 2006. The exhibition provides a unique opportunity to see the 'behind the scenes' skills and process involved in bringing creatures from the written page to the silver screen.

### Be an on-set animatronics puppeteer!

With 38 exhibits - including 10 interactives - visitors have the opportunity to get hands on. You can touch the alien guts from 'Pitch Black', manipulate a Megalania, run Inspector Gadget into a stop sign, control a reptilian monster, puppeteer the crocodile from 'Peter Pan', and do other cool stuff.

### Fun for everyone!

Fascinating and informative, 'How to Make a Monster' is proving popular with people of all ages. Featuring the work of 1995 Visual Effects Academy Award winner for 'Babe' - John Cox and his Creature Workshop, you'll engage in the arts of creative writing, creature design, story-boarding, computer effects, engineering, and so much more.
